

“FOR ALL YOUR FINISHING TOUCHES”

Apollo Patios® has introduced an exciting range of accessories to provide you with the finishing touches for your new Apollo outdoor home addition. Now there really is no need to shop around, with Apollo Patio Accessories it's so easy!

LOUVRES AND SLATS

Apollo Patios' Accessories range of louvres and slats will transform your outdoor living area by providing privacy and protection from the elements all-year-round.

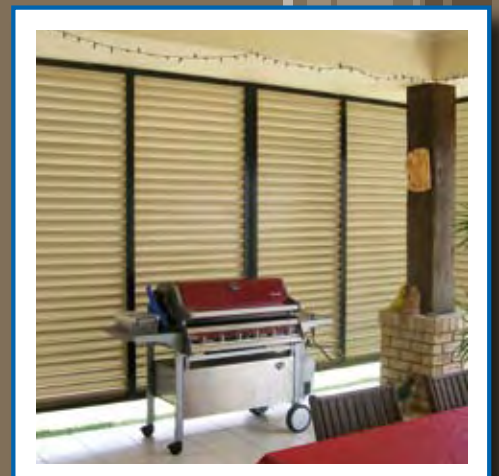

Our systems are constructed from powder coated aluminium materials, which are designed to compliment your Apollo Patios structure, while eliminating costly maintenance issues such as: painting, cracking and warping, which are experienced with timber products.

Louvres offer Full Protection, while slats offer Moderate Protection from rain, direct sun and vision. Each of the two products can be provided in either a vertical or horizontal configuration.

AVAILABLE LOUVRE & SLAT SYSTEMS:

- o Sun Screening
- o Privacy Screening
- o THERMOFLOW - Gable Infill Venting (horizontal louvres only)
- o Balustrade - (vertical slats only)

APOLLO PATIO ACCESSORIES

blinds ■ louvres ■ privacy screens

GEARED BLINDS

Geared Blinds are a perfect addition to any verandah, pergola or outdoor entertainment area. Geared Blinds are such a versatile option, simply wind-up the blind when you want to catch the cooling Summer breezes. Should inclement weather set in, shut out the wind and rain by winding-down the blind and securing with a stainless steel fastener. For even greater protection, optional side-zips are available.

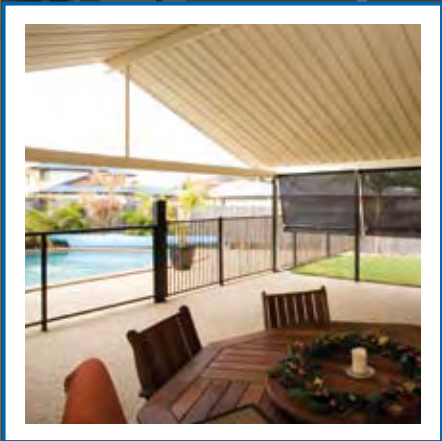

Available fabrics: - Clear or Tinted plastic
- PVC coated – polyethylene woven mesh

WALL SECTION BLINDS

Wall Section Blinds are our most economical blind system. Ideal for cooler evenings, these blinds can protect your entertainment area from all kinds of weather conditions and includes side zips for a weather-tight seal. The Wall Section Blind can be raised and lowered by hand or with an optional Rope & Pulley system.

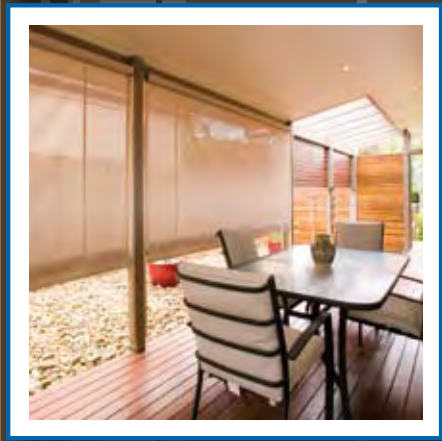

Available fabrics: - Clear or Tinted plastic
- PVC coated – polyethylene woven mesh

AUTOMATIC BLINDS

One of our most popular blind designs, the automatic blind consists of an internal spring recoil retraction system located inside the top roller tube, a set of zinc plated guide rails and wedge-lock projection arms. The projection arms, available in varying lengths, holds the bottom edge of the blind out, increasing the shaded area. The Automatic Blind can easily be pulled down to a suitable position; release your grip of the bottom tube and the blind locks automatically onto the guide rail. Once the blind is no longer required, grab-hold of the bottom tube, bend it downward and the blind is automatically retracted by the internal spring-recoil system.

Available fabrics: - PVC coated – polyethylene woven mesh

STRAIGHT DROP BLINDS

Straight Drop Blinds are ideal for screening-in your verandah, patio or pergola. A spring-loaded recoil actuator assists the raising and lowering of this blind. Stainless-steel fasteners are provided for latching the blind in the down position. Additional fasteners, for providing multiple latching positions, are an available option.

Available fabrics: - PVC coated – polyethylene woven mesh
- Acrylic – solid
